

EXPERIENCE

SERVICENOW - Workflow Automation | Senior Software Engineer

Dec 2024 – Present | Hyderabad, India

- Led the design and delivery of the Loopback feature for Playbooks in workflow automation, building a highly requested customer capability and working with cross-functional teams while managing the technical design review for Java and Go.js UI integration.
- Delivered ServiceNow AI native Playbooks experiences, including Hybrid and Autocomplete activities plus an agent-driven activity that fetches insights from internal data and enables agentic workflow behavior.

MICROSOFT - Azure Core Compute | Software Engineer 2

Jan 2022 – Dec 2024 | Hyderabad, India

- Designed and developed a risk/reputation-based threshold system for quota requests, saving \$6.88M per month by preventing risky customers from accessing resources.
- Designed and implemented a template-driven Quota Management System, reducing new Resource Provider onboarding time from 3 months to 2 weeks.
- Developed a Resource Provider onboarding framework, enabling teams to create and test quota request workflows, significantly optimizing the onboarding process.
- Automated region enablement for Compute SKUs, implementing thresholds and credit checks to reduce total quota support requests by 12% and enhance operational efficiency.
- Leading end-to-end development of capacity recommendations feature to reduce customer support time from 5+ days to 5-10 mins, including UX design, API integration, and cross-functional collaboration.
- Implemented multi SKU selection feature for quota increase, enabling users to request multiple quotas in bulk, saving significant time

MFINE | Software Engineer

Feb 2021 – Jan 2022 | Bangalore, India

- Visualized medical protocols using React in a graph node format, enabling users to see and create new nodes online for improved efficiency
- Led development of the Video Room feature for video consultations UX with doctors, including call pickup and other video room features, resulting in a more seamless and user-friendly experience for patients and doctors
- Introduced React testing workflow and Storybook, resulting in faster development cycles, improved code quality, and a centralized component gallery for streamlined development

ELITMUS EVALUATION PVT LTD | Sr. Full Stack Developer

July 2018 – Jan 2021 | Bangalore, India

- Used React to revamp the legacy online coding platform of eLitmus, into a new, faster UI, which helps the sales team with their pitch to customers.
- Designed and implemented proctoring and streaming solutions using WebRTC and Kurento for Online tests.

OPEN SOURCE AND PROJECTS

nodejs/node | GitHub PR's [↗](#)

- Notable change [↗](#): Introducing new CLI flag `--test-timeout`, in v21.2.0
- Other changes [↗](#): Refactoring readline-async-iterator benchmarks, node:process doc changes etc

Kumaoni | App Link [↗](#) | 10k+ downloads | 4.4 rating | Go, React Native

Maintaining Kumaoni language Android app as a side project, leading initiatives to promote and preserve the language within the community.
